

[Vote Climate U.S. PAC](#) announces our 2020 U.S. Senate priority candidates, those races where we will have the biggest, national impact, increasing our voting bloc and leadership for climate-action. This is the first time we focused exclusively on the U.S. Senate, when choosing our priorities. Retaking the U.S. Senate with climate-action candidates is the most important goal, if we are to pass meaningful climate legislation. All of our 2020 priorities are U.S. Senate candidates and all challenging powerful incumbents.

| Candidate Name | State | Climate Calculation | Candidate Name | Climate Calculation | DIFFERENCE |
|-------------------------------|----------------|---------------------|------------------------|---------------------|------------|
